

Cirrus Identity News

2025, Wrapped

In 2025, identity teams across higher education kept access running smoothly through app sprawl, guest users, protocol drama, and ever-growing security expectations with help from Cirrus Identity.

To say thank you, we created [Cirrus Wrapped](#): a quick, tongue-in-cheek look at the year in identity, highlighting the scale, patterns, and moments that defined access in 2025.

[Check out the full wrapped campaign here!](#)

Great to See You at TechEX and EDUCAUSE This Year!

It was great connecting with customers and colleagues at TechEX in Denver and EDUCAUSE in Nashville this year. We especially enjoyed hosting our TechEX social and spending time with the community, alongside thoughtful conversations about the evolving IAM landscape.

Thank you to everyone who joined us and we're looking forward to continuing the conversation in 2026 at Internet2 Community Exchange in Chicago!

Cirrus Identity Product Highlights

Product Momentum in 2025

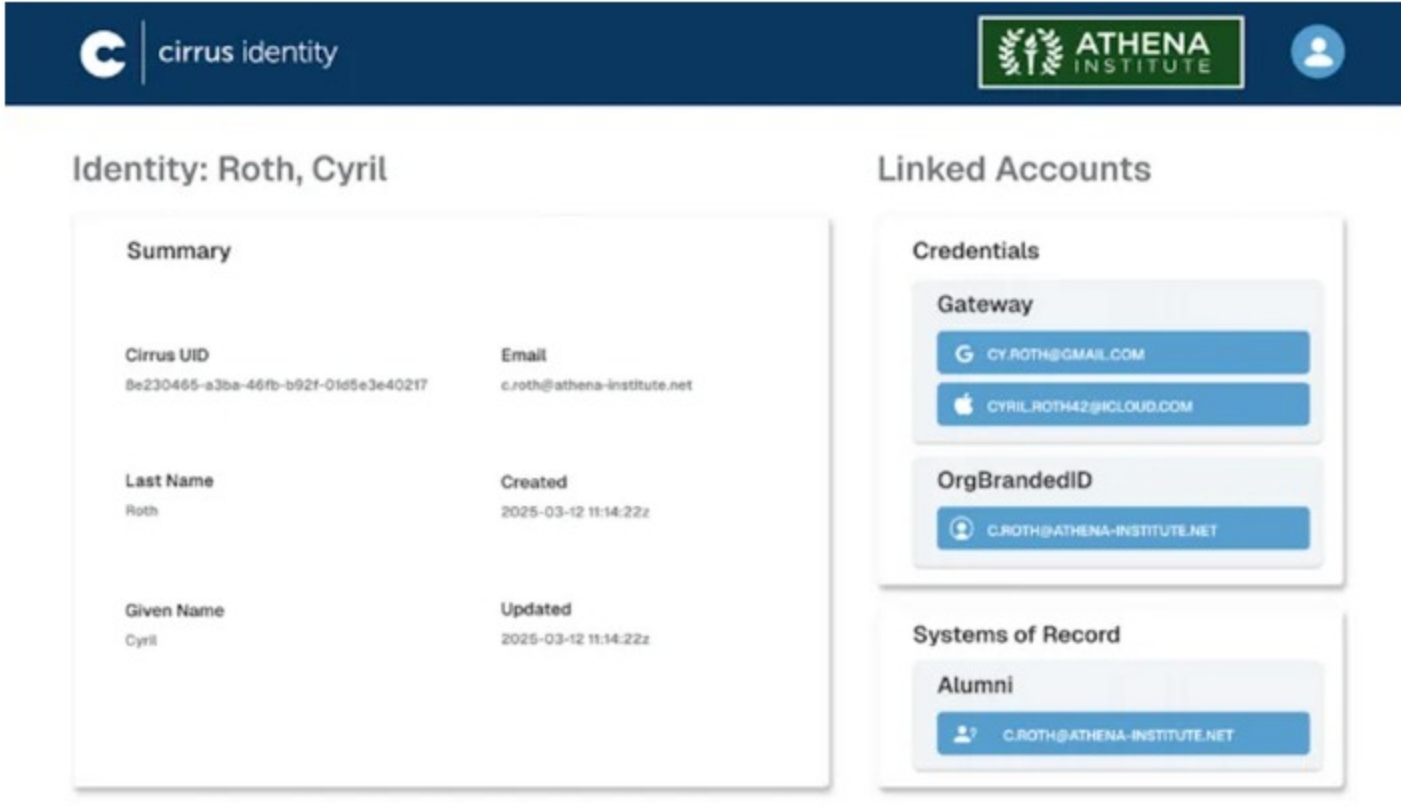

This year, we focused on reducing operational overhead, improving visibility, and making secure access easier to manage and support.

Cirrus IDAdmin - Delegated Identity Management, Simplified

Cirrus IDAdmin brings a person-first approach to identity management. Designed for service desk and support teams, it enables delegated access to manage individual users across Cirrus products while keeping core configuration within the Cirrus Console. Built as a foundation for growing product capabilities, IDAdmin emphasizes speed, clarity, and a unified identity context.

Key Highlights:

- Person-first view: search users, not systems
- Granular authorization and multi-org visibility
- Built for evolving product capabilities

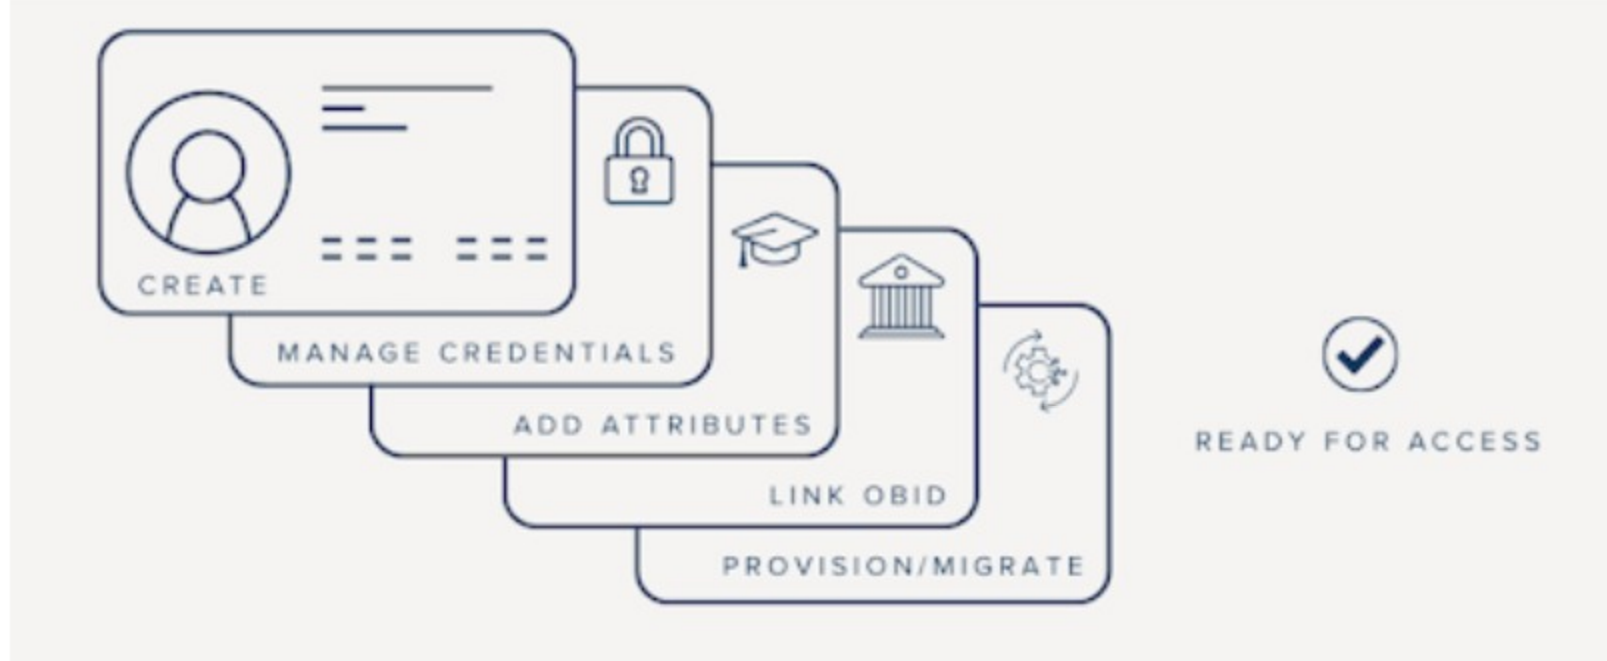

Cirrus APIs - Connecting Identity. Standardizing Access.

Cirrus APIs enable campuses to manage user data and activity through consistent, standards-based integrations. The Identities API supports user creation, migration, and attribute management across Cirrus services, while the Log API provides secure, automated access to event data for monitoring, analytics, and compliance. Together, they make it easy to connect Cirrus-managed data with existing systems - from your LMS to SIEM tools.

Identities API – Migrate, pre-provision, or manage user accounts with unified attributes

Log API – Stream Cirrus event data into SIEM or analytics platforms

Interactive Docs – Explore live endpoints and sample payloads

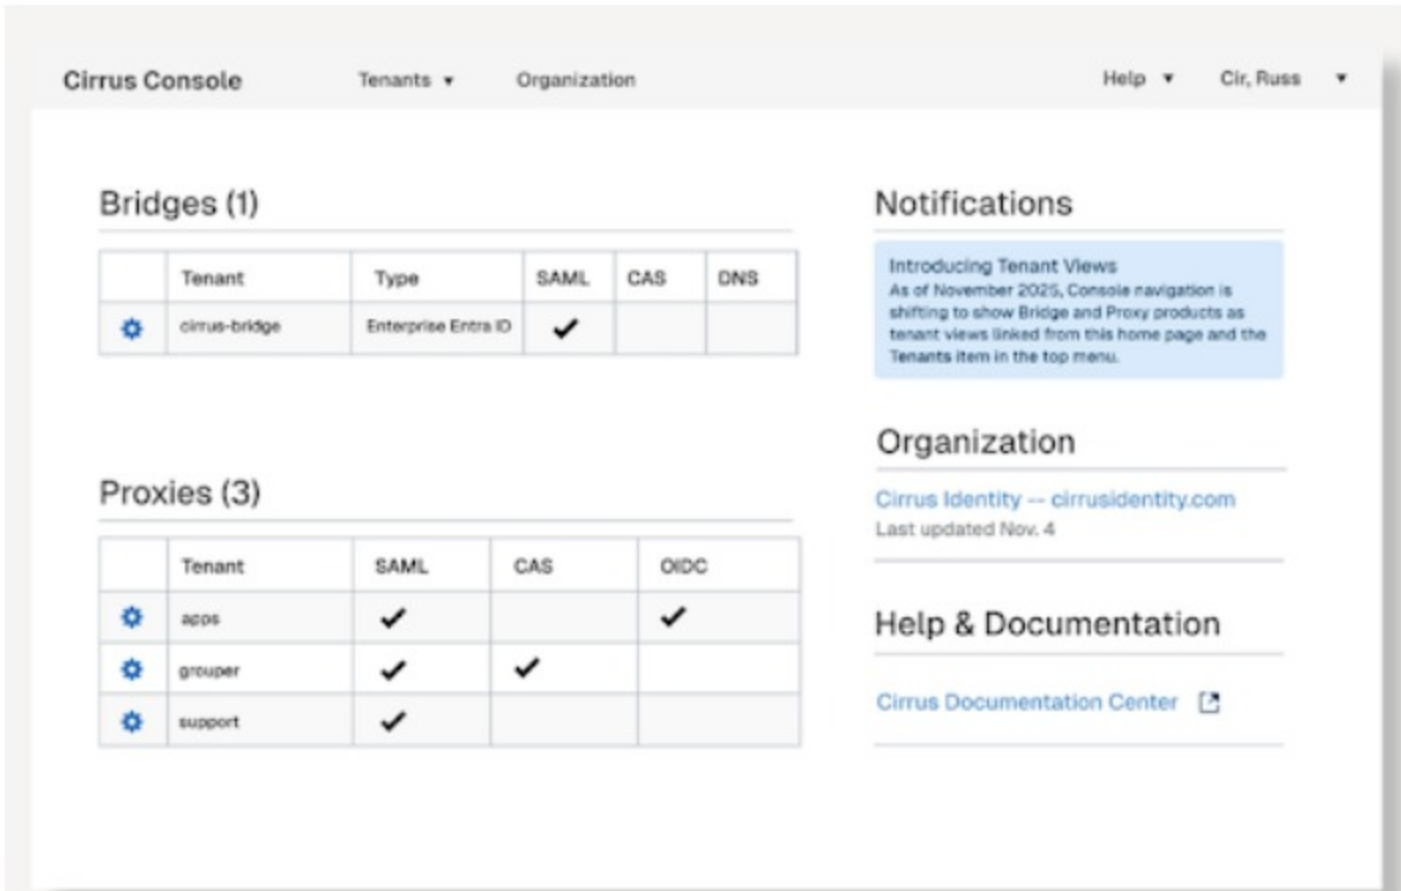

Console Updates - Your Deployment Ecosystem in One Unified View

Recent updates to the Cirrus Console introduce unified tenant pages that bring authentication sources and applications together in one view. IT teams can now manage SAML application metadata directly in the Console, with self-service capabilities expanding to cover all Bridges and Proxies subscribed to CAS support.

Key Highlights:

- New homepage and dashboard views
- Self-service application management
- Integrated CAS + SAML + OIDC support

Log in, explore, and experience the new Cirrus Console.

Cirrus Identity + eduroam

Cirrus Identity and Painless Security have partnered to deliver a managed, hosted RADIUS service that enables institutions to participate in eduroam. The service reduces IT overhead, simplifies configuration, supports a cloud-first strategy, and strengthens access across the global research and education community.

The Hosted RADIUS for eduroam solution is professionally operated, continuously maintained, and supported by experts, eliminating the need for institutions to develop in-house eduroam or RADIUS expertise.

The service is already live through a successful system-wide pilot with Texas A&M University (TAMU), leveraging Microsoft Entra ID for authentication and enabling seamless roaming access across the eduroam network. The implementation went live within a week, allowing TAMU System staff to securely connect using their institutional credentials at eduroam-enabled locations worldwide.

Following this pilot, we are now seeking additional institutions interested in participating. Interested in exploring hosted eduroam options? Connect with us at sales@cirrusidentity.com

Key Highlights:

- Enables Entra ID customers to participate in eduroam
- Delivered in partnership with Painless Security to provide managed RADIUS support
- Simplifies onboarding, strengthens security, and saves IT time
- Eliminates need for in-house eduroam/RADIUS expertise

Cirrus Identity Customer Highlights

Cirrus Identity Customer Implementations

Cirrus Identity customers are amazing! Here are the latest customers who have implemented Cirrus solutions:

August 2025

[August Customer Implementations](#)

- Boise State University
- Broad Institute
- Denison University
- New Jersey Institute of Technology
- NYU Langone Health
- SUNY Cortland

September 2025

[September Customer Implementations](#)

- Copper Mountain Community College District
- West Virginia University

October 2025

[October Customer Implementations](#)

- Providence College
- TAMU Texas Transportation Institute
- TAMU System

November 2025

[November Customer Implementations](#)

- DePaul University
- University of Nevada, Las Vegas

December 2025

[December Customer Implementations](#)

- Fort Valley State University
- Harvey Mudd College

Executive Letter from Dedra Chamberlin, CEO

As we wind down the year, we want to express our gratitude for all our customers, new and long-standing. We value not just your business, but the partnerships we have developed with you all and the ways our conversations help shape our product roadmap and our business priorities. It was wonderful to see so many of you in person at the Internet 2 TechEx conference. Thanks to everyone who joined us at our annual user social!

We hope to see more of you in 2026. We're planning to be at Internet2's Community Exchange and BaseCAMP, as well as EDUCAUSE CPPC and the EDUCAUSE Annual Conference.

Until then, we wish you all a very happy holiday time and lots of rest, relaxation, and time with friends and family.

Dedra Chamberlin
